EXPERIENCE

GeeksforGeeks

Android Developer Intern

Noida \circ On-Site June 2023 - Present

• Accelerate cold start time by 36% of GFG app via efficient optimizations.

- Revamp comment section, strategically restructured for efficiency, reducing 2x LOC while improved pagination using new APIs for increased efficiency.
- Build Features: Jobs Portal, Community Comment Disabling, Anonymous Posting, Account Deletion, Search in Bookmarked Articles, Sorting in Popular Categories, and Integration of Microsoft Clarity's Heat Maps for enhanced user interaction insights.
- Create efficient UIs via Epoxy with Two-Way Data Binding, streamlining view variables and state management.

FRND

Bengaluru o Remote

December 2022 - March 2023

Android Developer Intern

- Refactored code from RxJava to Coroutines & Kotlin Flows while adhering to Clean Architecture principles.
- o Implemented Domain Logic Segregation into distinct packages and classes, enhancing navigation efficiency by 2x.
- Utilized SDKs to capture User Events with a focus on optimizing UX using Deeplinks & Deferred Deeplinks.
- Facilitated Whale-to-Top User connections with an aim to improve user Engagement/Retention and Revenue.

Finocado by Startup Bay

Ireland o Remote

Android Developer Intern

Feburary 2022 - June 2022

- Leveraged Firebase for Database, Crashlytics & Analytics. Optimized application through thorough analysis and refinement.
- Developed and consumed REST APIs via Retrofit. Used MVVM and Components of Android Jetpack.
- Built CI/CD Pipeline using Github Actions for deploying the updated app to the testers on Firebase.

GeeksforGeeks
Technical Content Writer Intern (Profile)

Noida \circ Remote

January 2022 - June 2022

- Developed 10+ quality articles for Geeks For Geeks across the spectrum of Software Development.
- Researched about DevOps, Cloud Computing, Android and built understanding of the fields.

PROJECTS

Chat Room March 2023 - Present

Frontend (Kotlin, MVVM, Clean Architecture), Backend (Node.js, Azure, WebSockets (Socket.IO))

- Emphasis: Proactive pursuit of diving into WebSockets, driving innovative ChatRoom development.
- Features: A global social platform fostering connections with users worldwide.
 - * A WebSocket Backend powered by Node.js, hosted on Azure, providing seamless connections and chat experiences.
 - * Engaging chat rooms supporting multiple participants, featuring real-time updates on participants joining and leaving events.
 - * Coming Soon: Random Chats, Guess Girl or Boy, Guess Streaks, Coin System, and Redeemable Rewards.

Sign Ease [Playstore]

September 2022

Android (Kotlin, Coroutines, MVVM, NavGraph, Retrofit, Clean Architecture), Hello Sign, Firebase

- o **Problem:** Hostel students Drafting Leaves/Applications and getting Approvals/Refusals manually (signatures).
- Solution: A tool that gets your leaves signed from the respective authority or parent/guardian.
 - * Incorporated Hello Sign APIs for catering backend services and dealing with the Signatures.
 - * Pre-built templates and to-the-point manual details help you choose fast and get your approvals faster.

Feedback Prime Prize Winner

October 2021

- **Problem:** Filling survey/feedback forms after every support call.
- Solution: Built an android app for Generating Automated Report of Customer-Executive call.
 - * Utilized Async APIs by Symbl.ai which uses Conversation Intelligence for analysing the conversation.
 - * Followed MVVM Architecture; Used Retrofit; Recycler View for displaying the generated Report.

Suite Converter January 2021

- Python, Speech Recognition
 - o **Problem:** Hassle of converting files from one format to another.
 - Solution: A one stop easy solution with voice assistant for Major File Conversions.
 - * Used libraries like docx2pdf, pdf2docx, gTTS, SpeechRecognition and pysttx3 for converstion of files.
 - * Auto detects the Directory Path for keeping the files organised.

TECHNICAL SKILLS

- o Languages: Kotlin, Java, C++, Python, YAML, JavaScript, Node.js
- o Frameworks/Libraries: Room, Volley, Retrofit, Firebase, Android Jetpack, SQL, Hilt, Koin, Epoxy, DataBinding, WebSockets
- o Tools: Git, Android Studio, Postman, Jira Software, GitHub Actions, Docker, Azure, RealmDB

ACHIEVEMENTS

- Won 1st Prize for Sponsor's Track in API World Hackathon by Symbl.ai with the Challange Go Beyond Speech Recognition with Conversation Intelligence APIs.
- Achieved recognition as a Top-10 Finalist in the batch-wide Soft Skills Communication Competition.
- Attained the badge of Postman Student Expert.

EDUCATION

Chandigarh University

Bachelor of Engineering - Computer Science; CGPA: 8.33

Govt. Model Sr. Sec School, 37-B

Secondary School Education (Science); Percentage: 85.6

Stepping Stones Sr. Sec. School, 37-D

○ High School Education (Science); CGPA: 9.2
