SUMMARY

Results driven Android Engineer with 3+ years building production grade apps across OTT, HealthTech, and EdTech at scale. Expertise in video playback (ABR, DRM, ExoPlayer), Jetpack Compose, and end-to-end feature ownership from architecture to Play Store.

EXPERIENCE

- Mythik Entertainment** Mumbai ○ On-Site
SDE-2 Android Sept 2025 – Present
 - Engineered Mythik+ Premium Short Form Content using Jetpack Compose & Media3. Implemented robust preloading, ABR streaming, and Widevine DRM (L1-L3), reducing TTFF and playback latency across device tiers.
 - Architected dynamic track selection across network conditions & hardware decoders (AV1, H.265, H.264), ensuring smooth playback on low-to-high end devices.
 - Integrated Google Play Billing Library end-to-end, managed one-time purchase flows, entitlement validation, and edge-case states to ensure zero revenue leakage.
- Visit Health** Noida ○ On-Site
SDE-1 Android May 2024 – Aug 2025
 - Spearheaded growth of Visit's Android app from 500K to 1M+ downloads with a 99.46% crash-free rate, delivering a seamless user experience.
 - Designed wrapper functions to streamline API calls and state observation, transforming raw data into reactive streams and reducing redundant emissions.
 - Built and launched features including Online Consultation Chat, Self Booking, Cashless Savings, Prescription Query Chat, and Corporate Policies.
- GeeksforGeeks** Noida ○ On-Site
Android Developer Intern June 2023 – May 2024
 - Led development of GfG Jobs Portal, Community Comments, Global App Search, Explore Section, and Roadmaps improving user engagement by 55%.
 - Accelerated cold start time by 36% by resolving main thread bottlenecks and UI rendering problems.
 - Revamped Discuss Section, reducing LOC by 2x while improving pagination and comment rendering speed.
- FRND** Bengaluru ○ Remote
Android Developer Intern Dec 2022 – Mar 2023
 - Refactored codebase from RxJava to Coroutines & Kotlin Flows, adhering to Clean Architecture principles.
 - Implemented Domain Logic Segregation into distinct packages, enhancing code navigation efficiency by 2x.
 - Utilized SDKs to capture User Events, optimizing UX via Deeplinks & Deferred Deeplinks.

PERSONAL PROJECTS

- Chat Room** Mar 2023
Kotlin, MVVM, Clean Architecture, Node.js, Azure, WebSockets (Socket.IO)
 - Built a global real-time chat platform with WebSocket backend on Node.js hosted on Azure; supports multi-participant rooms with live join/leave events.
- Sign Ease** Sept 2022
Kotlin, Coroutines, MVVM, NavGraph, Retrofit, Clean Architecture, HelloSign, Firebase
 - Digital signature tool for hostel students; integrated HelloSign APIs with pre-built templates for fast leave approvals from authorities or guardians.

TECHNICAL SKILLS

- Languages:** Kotlin, Java, C++, Python, JavaScript, Node.js, SQL, YAML
- Frameworks/Libraries:** Media3 ExoPlayer, Google Play Billing, Jetpack Compose, Android Jetpack, Coroutines, ViewModel, MVI, MVVM, Room, Retrofit, Flows, Hilt, Koin, Epoxy, DataBinding, PubNub
- Tools:** Git, Android Studio, Postman, Jira, GitHub Actions, Docker, Azure, Firebase, RealmDB, Proguard, CI/CD

ACHIEVEMENTS

- Won 1st Prize (Sponsor's Track) at [API World Hackathon](#) by Symbl.ai – Go Beyond Speech Recognition with Conversation Intelligence APIs.
- Top-10 Finalist in batch-wide Soft Skills Communication Competition.
- Attained [Postman Student Expert](#) badge.

EDUCATION

- Chandigarh University** Mohali, Punjab
Bachelor of Engineering – Computer Science **CGPA: 8.33**
